

### **AMERICAN AUGERS**®

an Astec company

**Utilities** Communication Sewer Drainage

Augers. Quik Tran provides up to 10,000 lbs. (4,536 kg)

or 20,000 lbs. (9,072 kg) with dual drives of push/pull at high speed with no dogging or winching during

retract. It engages directly to the machine track for

easier operation in challenging work conditions.

\*Not available on 24/30-150 model.

American Augers offers a huge selection of auger boring tools and accessories to compliment any job you encounter.

### Manufacturing the Latest in Auger Boring **Technology for over 40 Years.**

- Featuring an exceedingly productive rack & pinion system. No dogging or winching occurs when rapidly pulling the machine back to the starting position on the track.
- Fast! Necessary for pulling auger, steering rods and pushing product.
- High operator visibility into master pusher.
- Tremendous stability from the low centerline and wide stance.
- Hydraulically assisted clutch (not available on the 24/30-150 model) is easy and comfortable to operate.
- No hook rollers because the machine locks safely to the track.
- Easy auger installation with ergonomic operating controls. Allows for feathering of the rotation and slow turn of the shaft.
- Gauge system includes engine tachometer, engine warning light, hour meter and thrust pressure reading.

The American Augers line of underground construction equipment is second-to-none.

- Auger Boring Machines
- Maxi-Rig & Mid-Size Directional Drills
- Oil & Gas Drilling Rigs
- Mud Pump & Cleaning Systems
- Product Tooling & Accessories

American Augers products are manufactured at the company's 241,000 square-foot facility in West Salem, Ohio, in the heart of Amish country between Columbus and Cleveland.

Since the founding of American Augers in 1970, there has never been a change in the company's core value: having products developed by a can-do work force that focuses on mechanical, technological and customer-based design improvements. Our goal is to always exceed customer expectations by providing products that are not a cost of doing business, but an <a href="Investment in Success.">Investment in Success.</a>

**Did You Know?** American Augers was the first HDD manufacturer to eliminate chain and utilize a rack and pinion carriage design which is now the industry standard. Our rack and pinion drive provides smoother carriage movement, more precise operating control, long system life and no complicated parts.

American Augers machines are supported through a dedicated parts and technical service department. We are here to help whenever you need us 24 hours a day, 7 days a week, emergency or not.

### www.AmericanAugers.com

### **Environmental Commitment**

American Augers is committed to manufacturing equipment that helps to preserve the sanctity of the global environment, and has done so by reducing noise and/or emissions outputs, and emphasizing the fact that our trenchless technology equipment requires little or no open cutting, which has very minimal impacts on natural surfaces, features, or habitats.

## Disc Cutter Head

The American Augers Disc Cutter
Head offers auger boring contractors the

**Head** offers auger boring contractors the latest in field-proven technology to succeed in hard rock or other intrusive ground conditions up to 25,000 psi (1,724 bar).

Retractable, Large Diameter Cutter Head with Increased Access Power Assisted Steering Jacks let the operator make steering corrections with ease and precision. **Retractable Steering Assembly** gives better access to service the cutter head.

**Spoil Removal.** Greater area for quick removal and passage of spoils from the face: cutters do not roll over in spoils.

**Hex Adapter** adapts to any size or brand of auger boring machine with a 4 in. (102 mm) or 5 in. (127 mm) hex.

Casing/Diameter Size	Head Diameter	Hex Size	# of Cutters	Required Torque	Required Thurst	<b>Total Weight</b>
24 in. (610 mm)	26 in. (660 mm)	4 in. (102 mm)	9	7,800 ft. lbs. (10,580 Nm)	94,995 lbs. (43 Tonnes)	2,225 lbs. (1,009 kg)
